US feed gas 101 – Part 2, Managing the infrastructure: pipelines, mid-stream, storage

Buyers of feed for US LNG plants will soon descend upon the American gas market, including firms who have rarely, if ever, operated in this kind of procurement environment. In the second part in this series of articles, Gas Strategies shines a spotlight on delivering feed gas to an LNG plant, diving into the world of steel, ie, pipelines and other infrastructure that separate gas wells from LNG export plants.
