Australia still set to be biggest LNG exporter; delays make 2018 target a challenge

Between 2009 and 2012 LNG project developers in Australia sanctioned seven green-field liquefaction projects with aggregate capacity of more than 60 mtpa. Three trains have already started up and two more are scheduled to do so before the year-end. Gas Strategies looks at where the projects are today, their likely delays and cost overruns, and the impact of low oil prices on their profitability.
