Ukraine to cut imports by at least 35% by 2020 – OIES

Ukraine's dependence on imported gas in 2020 could be 35-63% below levels in 2014, thanks to market reforms and energy efficiency measures, the Oxford Institute of Energy Studies (OIES) said this week in a report.

Research estimates that Ukrainians inflows could total roughly 6.5-11.4 Bcm/year by the end of period, based on BP statistics showing imports at 17.5 Bcm/year in 2014.
