## Eni drilling positive for 30 Tcf estimate at Zohr field

Eni has drilled and tested its fifth well at the offshore Zohr field in Egypt and is on the way to confirming gas-in-place resources of 30 Tcf at the prospect, the Italian company said this week.

The well in the south-west portion of the field yielded “excellent reservoir characteristics”, Eni said, adding that tests suggested production rates of up to 250 MMcf/d (2.6 Bcm/year).
