Eggborough to replace UK coal-fired plant with CCGT

Eggborough Power Limited (EPL) has launched a consultation to develop a 2 GW combined-cycle gas turbine (CCGT) power plant at the site of its existing 2 GW coal-fired plant in East Yorkshire.

Through the consultation, EPL is inviting feedback from stakeholders and the community on the project, which it would link to the UK's transmission grid via a new underground pipeline to be installed to the north of the power station.
