Petronas sends first-ever offshore volumes to FLNG unit

Malaysian state-run Petronas has become the world's first company to feed gas produced offshore to a floating liquefaction (FLNG) unit, the company said on Thursday.

The KAKG-A processing platform in the Kanowit field in the South China Sea began sending out gas on November 14, marking the start of commissioning for the 1.2 mtpa Satu FLNG unit, Petronas said.
