# Bahrain LNG import project reaches financial close

Bahrain LNG has reached financial close on its proposed 800 MMcf/d (8.3 Bcm/year or 6 mtpa of LNG) import terminal project, which aims to help the Gulf state meet peak demand.

The terminal project, comprising a floating storage unit (FSU) and an onshore receiving facility in the Hidd Industrial area, is expected to come online in 2018. Bahrain's gas demand is estimated to be rising at 4% annually.
