Engie sets sail aboard ‘world first’ LNG refuelling vessel

French energy giant Engie has taken delivery of a purpose-built LNG bunkering vessel that will supply LNG as a marine fuel to ships operating in northern Europe.

The ship, named Engie Zeebrugge after its home port in Belgium, will run on LNG for her maiden voyage after a few days of fuel loading at the Yeongdo shipyard in Busan, Korea, where she was built by Hanjin Heavy Industries & Construction.
