Ofgem taps DNV-GL and National Grid to boost renewable gas in UK supply mix

The UK energy regulator Ofgem has hired DNV-GL and National Grid to modernise how consumer gas bills are calculated to enable a greater share of lower carbon alternatives in the supply mix.

The award of the GBP 4.8 million innovation contract “reflects how serious the UK’s gas grids are about delivering low carbon heat,” according to David Parkin of National Grid Gas Distribution.
