Centrica teasing out more gas from Morecambe Bay

Centrica is set to kick off a GBP 60 million (USD 77.3 million) refurbishment project at its Morecambe Bay platforms in the Irish Sea that could unlock as much as 3 Bcf of additional gas.

The UK utility will refurbish the 5,000 tonne DP6 and DP8 production platforms, which will require a 350-strong workforce, 300 of which will be stationed offshore.
