# Small-scale LNG – Part one: Can mini liquefaction deliver big?

In his 1889 novel, *A Connecticut Yankee in King Arthur's Court*, Mark Twain wrote: "Many a small thing has been made large by the right kind of advertising." Raising the profile of mini liquefaction is certainly a priority for companies such as Dresser-Rand, Linde Engineering, GE Oil & Gas and Wartsila, as they race to make big business out of relatively tiny liquefaction trains. In this article, the first in a series on micro- and small-scale LNG, LNG Business Review spoke to all four players about the challenges and opportunities that lie before them in this nascent segment of the liquefaction industry.
