Colombian FSRU ends eight-month dry spell with second LNG delivery

Colombia's floating storage regasification unit (FSRU) received its second ever LNG shipment last week, eight months after the terminal's inaugural cargo in November 2016.

The 80,000-cm payload, delivered to the 170,000-cm Hoegh Grace on 26 July, marks the end of a dry spell for Calamari LNG, the Colombian consortium created to buy LNG for a group of power generators known as Grupo Termico.

With waning indigenous production and domestic demand forecast to ...
