# The Volkswagen interview: Jasper Kammeyer, head of group technology strategy for CNG mobility

The first quarter of 2018 saw a 60% increase in the sales of compressed natural gas (CNG) vehicles in Europe, the first increase in five years. Leading the charge was Volkswagen, which was responsible for nearly a quarter of the increase with sales of the CNG model of its VW Golf alone. Gas Matters spoke to Jasper Kammeyer, head of group technology strategy for CNG at Volkswagen Group on the sidelines of the Flame 2018 conference in Amsterdam, about the company's CNG strategy and the critical role of the natural gas industry in promoting gas as a transport fuel.
