‘Clean hydrogen can solve what electrification cannot’: Amir Sharifi, CIO, Hy24

Amir Sharifi is a senior managing director at French private investment house Ardian. In 2021, he co-founded Hy24, the world's first investment management company fully dedicated to scaling up the clean hydrogen economy. In this exclusive interview, he explains why clean hydrogen is going to fit into the shoes of the current oil and gas industry, and highlights that clean hydrogen, while set to play a relatively small role in the future energy mix, but often described as an “over-hyped” concept, faces the same unwarranted scepticism renewables faced 15 years ago.
