Slow growth in Q4 '14; LNG activity for the year up on 2013

?Total LNG supply in visual_editor014 reached visual_editor41.3 mt, up by 3.1 mt (1.3%) compared with visual_editor013. Although it was the first significant increase since visual_editor011, supply was still marginally below the level reached three years ago. The outcome was also lower than was expected at the beginning of visual_editor014. Gas Strategies reviews LNG supply and demand in the fourth quarter of visual_editor014, the year as a whole, and assesses the implications for visual_editor015.
