India's power plans could leave gas-fired plants stranded – IEEFA

India is a huge growth market for electricity, but the high operating costs of LNG-to-power compared to coal and renewables could leave gas far behind in the mix, according to the US-based Institute for Energy Economics and Financial Analysis (IEEFA).

In a report on the Indian power sector released this week, the IEEFA asserts that government plans for upgrading the power system are still likely to...
