Oil prices climbed on Wednesday, with the front-month Brent and WTI contracts settling 2% higher on signs of improving demand. US oil inventories fell by 562,000 barrels in the week ending 18 December to stand at ~500 million barrels, according to data from the US Energy Information Administration (EIA), with gasoline stocks falling by more than expected. The news filtered through to the market, with Brent returning to the USD 51/barrel range and WTI hitting USD 48.12/barrel.

Front-month European gas prices fell marginally after settling at near two-year highs on Tuesday. UK NBP closed at the equivalent of USD 6.87/MMBtu with Dutch TTF settling at the equivalent of USD 6.26/MMBtu.

The losses were mirrored on the other side of the Atlantic as US gas benchmark Henry Hub fell by 6.2% to close at USD 2.61/MMBtu. Asian spot LNG marker JKM also fell, settling 2.1% lower to close at USD 10.53/MMBtu.

The European carbon price continued to climb, with ICE's front month EU allowance (EUA) contract closing 2.5% higher to settle at EUR 31.77/tonne.
