European gas prices spiked on Thursday after Equinor announced a production halt at its Hammerfest LNG export terminal.

As a result, NBP surged 8.9% to USD 7.87/MMBtu, and TTF rose 8.1% to USD 8.38/MMBtu.

The market has reacted sharply to the shut in of the facility after the detection of a leak at the Melkoya-island-based plant in the Arctic. The leak was detected only days after repairs were completed on a separate issue that kept the plant offline for the month of May.

As of Thursday morning, Equinor said the leak has been contained, but that it was too soon to say when production would resume.

Meanwhile, spot prices for LNG in Asia fell 0.9% to USD 9.29/MMBtu, therefore continuing to trade at a consistent premium over the European benchmark.

Henry Hub saw its front-month price slip 2.6% to USD 2.27/MMBtu, under pressure from steady production and modest demand.
