# ‘Hydrogen has had a reality check’: Anne-Sophie Corbeau, Centre on Global Energy Policy, Columbia U.

Anne-Sophie Corbeau is a global research scholar at Columbia University's Centre on Global Energy Policy. In this exclusive interview, she explains to Gas Matters why the US pause on approvals for new LNG export projects “is no cause for concern” and highlights how disruption at the Panama Canal and Red Sea could result in “intelligent solutions” for LNG trade. She also offers her thoughts on the impact this bumper election year could have on the energy transition and why carbon sequestration and hydrogen both are key on the path to net zero.
