Rise and shine: Renewables on course to overtake coal-fired generation by 2025

Last year was a record one for renewables globally, with a massive expansion in installed capacity rekindling hopes that climate action targets, such as the renewables commitment made at Cop28 last year, can be met. But some segments of the renewables industry face lingering problems, with many offshore wind and green hydrogen projects still grappling with the high-cost environment that began forming in the Covid-19 pandemic.
